

# ABBOTT IS HERE TO HELP YOU GET YOUR WEBSITE UP AND RUNNING

When setting up products on your website you will likely require:

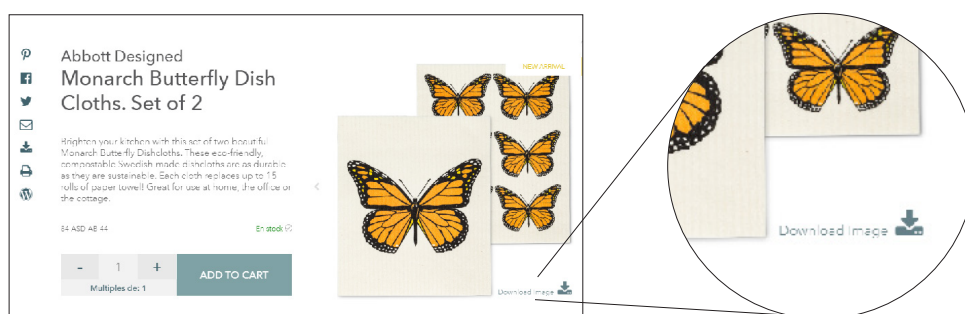

- Product images and lifestyle/glam images
- Product descriptions and keywords
- Product titles
- Product sizes and weights

Abbott can provide all of this for you!

- Just go to our website and create a Wish List with the items you have selected for your website.
- Then, email your Wish List to [webadmin@abbottcollection.com](mailto:webadmin@abbottcollection.com)
- We will email you a link whereby you can download all your images and product data. (We'll be available to do this Monday to Friday during office hours)

Or, you can get all of this information yourself, directly from our website!

- All image high resolution downloads are available online after login. Hover over the image then click the icon on the bottom right of the product to download.
- All product data can be copied and pasted.

## Remember

- You don't need to hold inventory of the items on your online store.
- As products sell online, simply place your order with Abbott. (Product minimums apply)

To get you started, we have compiled a list of best-selling, in-stock items which are perfect for online sales.
